5 Technical info 10 Bose almost always uses cone tweeters because of the delicious sparkling sound. Incidentally, these tweeters can take a beating, so they do not blow up easily A thick 20 cm woofer guarantees a deep low bass, and also a clear middle area. The whole gives a nice and complete sound stage. Virtually all the music kinds sound great with a very natural sound and amazing good dynamics. Even Bose haters will probably be amazed, because they are usually biased and therefore have not yet taken the trouble to listen to this sublime sound. The cabinets are designed according to the ultimate Bose philosophy and a lot of thought has gone into the design Bose speakers are popular with a wide audience. All pictures are of the item offered and form part of the description stands NOT included. The pictures are in some cases cropped but otherwise unprocessed for an honest portrayal of the object. User manual is included copy. I pack my items very carefully in a sturdy if necessary, double box, protected with styrofoam and bubble wrap. Shipping is done via GLS. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. David A Barclay 3.0 out of 5 stars Same model but different cabinet finish. With a vintage Sony receiver. Rockin' Anyhow, they impressed me for 19 years. From the highs, down to under 40Hz, they sound balanced and excellent, even though they're ported. I had a sub for a while, but I loved the portability moved a lot in my 20s of 2 speakers and a receiver, plus all the sound was punching you in the face, rather than firing at the floor or the wall. Recently 2 or more voice coils finally have given up and sound pretty shredded. I'll get another used pair of IVs before I get the V, or just give up and go for a 2.1 setup. I'll miss having all the sound at ear level, but life goes on. I know there are a ton of bookshelf speakers out there to choose from, some very high end, but there's just something about these speakers that have kept me hooked for the past 37 years. There is something to be said for the enduring, reflective sound aspects that the 301s are famous for. The 2 angled tweeters really project sound all over my house with amazing clarity. It's especially good with classical, jazz, or electronic space music. Flutes, pianos, violins just sing with stunning clarity. Of course, I use them with the home theater aspect as well. Needless to say, this setup has given new life to the 301s with added power and depth. I've always liked how the 301s lie flat, so they're not as obtuse and noticeable, if that's your preference. Get a pair of these, you won't be disappointed! Bose is not typically designed for loudspeaker applications. If you want a loudspeaker primarily for music, then this isn't the ideal speaker for you. They are great home theater main or surround speakers. They sound great with good full range. When these finally give out, I'll upgrade to the newest series of 301s.

They can fit comfortably on a shelf or in an entertainment centre, yet use proprietary Bose technologies to convey much of the power of a live performance. Proprietary

technologies built into these bookshelf speakers let you enjoy balanced stereo sound almost anywhere in the room, not just in one “sweet spot”. Woofer and port geometry complement each other so you can enjoy cleaner and deeper performance in the lower frequencies, particularly at high volumes. Enjoy a balance of reflected and direct sound for a spacious, natural experience much like a live performance. Use these speakers for music, or film sound—they can be used as main, secondary or surround home cinema speakers. Went to a apartment that belonged to the sister of a friend of mine. We were just hanging out and she turned on some music. The sound i heard coming from those 301s was unlike any i had heard. It was then I knew I had to have that sound and although I still havent purchased a pair Ive put together a couple of nice stereo systems that have satisfied my music fix. I think Ill order a pair just to relive that experience so many years ago. Cheers and enjoy the music, bring back the memories Great base, solid units and look just a good. I also purchased the stands and that enhanced the beauty and sound quality because of the reflective variance vs sitting flush against a back wall or bookshelf. Learn more or change settings here. Enjoy a balance of reflected and direct sound for a spacious, natural experience much like a live performance. Use these speakers for music, or film sound—they can be used as main, secondary or surround home cinema speakers. These speakers are absolutely amazing. They can rock the house with ample bass, precise mids and the front and rear tweeter design generate clear highs. Make sure you set them up properly and if using them as mains, toe them in a bit. For the record, when compared to my 2 other pair of much more expensive speakers the 301s not only hold their own, but in many instances they are my go to speakers. I use banana plugs so changing up my speaker sets is as easy as pie. The 301s have been around for decades for a reason. Enjoy! Sound difference was amazing. Friends are always amazed at the quality of the sound of these speakers. Click here for more information on the types of cookies we use and how to change your cookie settings. Two tiny holes at the bottom to secure them with the stands. Original manual included Please login or register here. The factory JBL subwoofer in my 2006 4Runner blew a few months ago and I really didn't want to go aftermarket because of just how great the stock system sounds with no bulky sub or amp taking up precious cargo room. I ordered the repair kit Friday, and here it is Monday and the sub is already repaired and back in the truck. I am extremely impressed by the quality of the replacement surround and the simplicity of the installation, not to mention the great price. Your instructions were top notch and having a YouTube video to watch just to double check the steps is just icing on the cake. I am a bug believer in repair instead of replace when at all possible, and I will most definitely be ordering from your company again in the future. Please, please keep up the awesome things you all are doing. In a disposable world, it's a relief to see a company that still believes in repair. Thank you so much! The foam edge kit I ordered arrived in only two days. Your online videos provided me with everything I needed for a first-time foam edge repair. My Mach 3s sound great again. Great doing business with you. After watching their excellent video on how to repair my woofers, I was about to buy one of two repair kits, but after I sent a photo, they identified that neither kit would work for my repairs, and that the only option was replacement which saved me buying a repair kit or two, as well as a lot of time and frustration. Taking this time to answer my rookie questions, even though I was obviously not going to be a high-dollar customer, really impressed me. I buy things online now and then, mainly through Amazon, but I have never taken the time to write a review before, if that tells you anything. An easy way is to view their instructions ahead of time. Before ever ordering I watched the video on repairing my 128H speakers.

It covered things I didn't know differences in diameter cones, and fully showed the repair process. Not only that but Sean Ryan guy in the video actually looks like he's talking from experience unlike the other videos I viewed. Honestly he looks like he could refoam a speaker in the dark. Anyhow, warm fuzzy feelings that if I hit a snag I could call someone and they'd actually know what I was talking about. Plus other kits I looked at really do seem to come with the same white glue that we

ate in kindergarten. The quality of the foam seems good too. Anyhow, after watching the video and reading their instructions I refoamed two speakers on my kitchen counter in a Friday evening with no trouble at all and the speakers sound great once again. First time order from Simply Speakers and I have to say I like the glue that came with this order a good deal better than the two different glues received from the competition in the past. The other worked as well, but this was a good deal easier to work with in my opinion. Your quick response team is awesome in answering questions. Your super fast shipping cant be beat. You have outstanding customer service. I would highly recommend you to anyone looking for excellent speaker repair products. Many thanks for helping me get my stereo back up and running top notch. Have a wonderful day! I called to inquire about refoaming my vintage Heathkit AS1348 woofers last Friday. I was not hopeful of a favorable outcome considering their age and rarity. However, when I called I was pleased to learn that my speakers indeed could be repaired. I was shipped the NewEdgeIt repair kit on Monday and as of Friday morning I am listening to them in all their former glory. Although I had never attempted such a repair or even knew it was possible, with the help of your online videos it was simple and straightforward. Many thanks for your prompt and courteous service.

As I am now retired, I look forward to many more years of enjoyment from my system which I built more than 30 years ago. If you are a person who does electrical work in the home, you may have noticed that it is quite difficult to understand how to repair a battery operated radio for the shower. If this describes you, then you will get these easy to follow steps really beneficial. Your bathtub comes with a valve thats situated underneath the water faucet. It provides water from the faucet into the drain in the bathroom. Since the water faucet is connected to the main house system through the pipes, it requires that all water is managed in an accurate way. Electric showers are available to suit various tastes. This includes a simple process to the repair process. To be able to correct a battery operated radio to the electrical shower, you should produce a circuit with a switch to change the power to the control panel. It is possible to use a switch with a device known as a push button. The push button will be installed over the door handle, which means you will be able to turn it off effortlessly. To determine the place of the buttons on the door handle, you should first check the directions of this circuit. Make sure that the device labeled left button is in position. Now, you should check that the other button is set up. To resolve a battery operated radio for the electric shower, you need to prepare the water supply valve using a pressure regulator to make certain that the handle has adequate resistance to avoid the door handle from becoming stuck in the closed position. If the water flow is too slow, you should remove the water from the shower. Doing so will help you determine whether the pressure valve is working properly. Because the valve is attached to electrical wires, it demands that you make sure they are not damaged. You should replace it in case you see some signs of corrosion on the wires.

If the wires are damaged, you need to replace the unit when possible to avoid additional damage. After eliminating the switch, you must reconnect the control panel on the shower. If there are no signs of rust on the electrical wires, you need to set up the new switch. After installing the change, you should hook up the cables onto the valve to its initial location. You should also plug the electric cable into the outlet in the control panel.
