Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. Please try again later. Robert W. Childs 3.0 out of 5 stars Seems to play all of the files in order. You can skip ahead one file at a time; I haven't found a way to navigate directories. It remembers the last file played and starts up from there when you plug it in. At first, it would always start broadcasting on 87.5, so it took about 20min every time to skip ahead one channel at a time to a useable frequency.

Lately it has stayed on the last channel used, but still displays 87.5. Is it broken or did I find an undocumented feature. No way to know. If you have an old radio with no inputs, this will do the trick for next to no money. Shut up and be thankful it works at all. The one small flaw is that it doesn't retain the station I usually want it on once I disconnect. This does go on stations below 88 FM and that's important. I tried another brand that started at 88 and from there up there's a lot of regular FM that bleeds in when using these things. One other thing that's a huge plus in my book is that this uses regular connecting ends between it and my Ipod. The problem I've had with other units was that the connector to the unit was smaller than the connector to the Ipod and finding replacement connectors

was near impossible. If these go bad they'll be easy to replace. I mean, showed up with a Chinese address on it and Chinese postage. No middle man. Very cheaply made. I'm not shocked. The connection isn't great, but it's passable. I don't think that the USB port allows me to charge my phone as I'm using it as an MP3 player, or at least isn't charging it consistently. Took FOREVER to show up almost a month. Overall not the worst purchase I've ever made, but not the greatest either. I contacted Crazy Cart who advised to replace fuse both I and Radio Shack looked at fuse and noticed it's fine. But I bought new fuses anyway. Still didn't work. I contacted Crazy Cart again. Let them know that I even tried it in different vehicles. They promptly shipped out a replacement. Bravo Crazy Cart for being a good company. The new one came and worked just fine, as advertised. I would have gave four stars had it worked the first time. It isn't Crazy Cart's fault the transmitter was defective. I gave three stars to Crazy Cart for standing behind their product. Changed my review to 3 stars because it didn't last long. A few months later it stopped working.

The cigarette lighter adapter broke inside rendering it useless. I'm glad it was cheap. You get what you pay for I guess. And as long as you have good speakers there shouldn't be much static. You can use your mp3 player or a sd card which I prefer to store the music. All in all I got a good deal. My experience with them was there can be a lot of static in the output. By moving the wire and or the MP3 player around however, the static can be eliminated. I tried it with two different iPods. If the wires or player are accidentally moved, there can again be static. If you find the exact spot for the player and wires however, the sound is good. For the price it's ok. Built-in microphone offer your clear talking and wonderful music. It will record the song which you were playing last time and play it again when you restart the car. Moreover, It has two USB charging port which is up to 2.1A 5V to charge most electronic devices. With this product, you have no need to worry about charging your mobile devices while traveling. It is perfectly suitable for the car owners. Payment on delivery. Some items have different policies or requirements associated with them. Any irresponsibility on the part of the customers shall not be tolerated. If you want NextDay, we can save the other items for later. Order by, and we can deliver your NextDay items by.
